

## Windows & Details

### Airbus A.330 / A.340

This decal provides one complete ship set of cabin and cockpit windows, complete with frames, plus cabin door chaffing plates and cabin door handles sufficient to complete one 1/144 scale Airbus A.330-300 or A.340-300. This decal will fit the Revell Airbus A.330 and A.340 kits.

#### About the Decal

The A.340-300 and A.330-300 are the longest members of the A.330./340 family announced to date. The cockpit window arrangement is common to all aircraft. As the cabin window spacing is consistent, the window decals can be adapted to the shorter A.330-200 and A.340-200.

#### The Windows

Apply the black cockpit windshield and cabin windows first, and allow to completely dry before going on to the next step. Confirm whether your model needs them, and apply the silver window frames over the black windows. Note that the rear sections include the slope change that is a characteristic of all Airbus wide body airliners. If you are building a series 200, the four windows should be removed from the level section (not the sloped section).

Cabin window counts are as follows:

	A.330-300 / A.330-400	A.340-200
Forward Cabin	17	17
Center Cabin	8+20	4+20
Rear Cabin	25	21

#### Acknowledgements

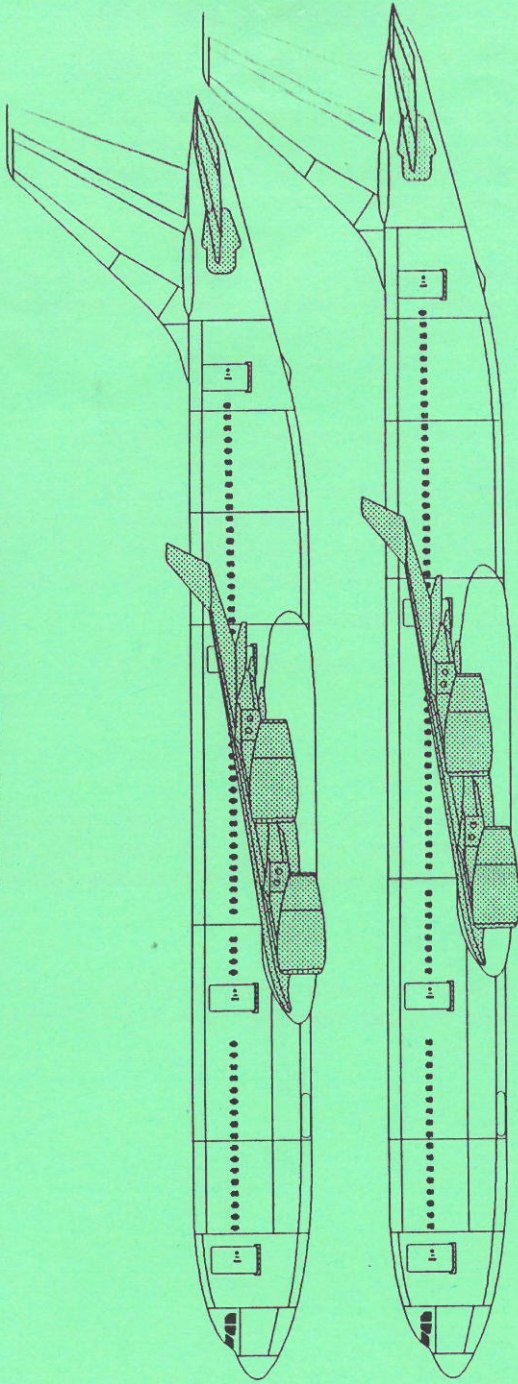

Airline Hobby Supplies thanks Mr. Jennings Heilig of Liveries Unlimited for his assistance with the detail artwork. AHS also thanks the Canadian Armed Forces for giving access to an A.310, from which window size and spacing was measured.
