

Your product shall have the following **contents**:

- spruce with 13 **beacon lights** casted from clear red resin

Instructions:

1. Separate the desired beacon light from the spruce using a resin saw. Be careful not to slip with the saw.
2. Use PVA glue to attach the beacon to the painted and varnished fuselage. Refer to photos for the exact location.
3. Wipe off any excess glue you're **done!**

Spruce layout:
