INSTRUCTIONS FOR ASSEMBLING

717

USS BAINBRIDGE

AURORA

IMPORTANT - READ THIS FIRST!

Before assembling model, study sketch carefully.

Important—Apply cement to inside surfaces only. Avoid getting cement on outer surfaces of model sections. Use cement very sparingly and avoid getting cement on hands, so as not to mar or smear plastic surfaces.

Do not hurry. Work carefully and patiently. Important Note: Before proceeding to cement parts together, it is advisable to fit parts together dry (without cement) so that you may familiarize yourself with the parts and how they go together, also noting the points where cement is to be applied.

For best results assemble model exactly in the order indicated.

This kit is molded of styrene plastic—Use only Aurora's Fireproof Styrene Cement. Assure yourself of a perfect model every time!

Facts About The USS BAINBRIDGE

Not until recently were the amazing results of nuclear-powered surface ships recognized. One such ship is the nuclear-powered guided missile frigate USS BAINBRIDGE. This is one of the U.S. Navy's most advanced ships. Standard displacement is 6,500 tons; length is 564 feet. It carries two Terrier twin launchers, fore and aft, an 8-tube ASROC launcher immediately in front of the bridge and two 3 inch anti-aircraft guns for armament. The BAINBRIDGE also has an aft platform for ASW helicopter operation. Radar and communications antennas can be installed in most ideal positions since there are no high funnels or hot exhaust gases to cause interference.

Nuclear-powered ships, such as the USS BAINBRIDGE, can travel almost unlimited distances at sustained high speeds with maximum efficiency and at minimum cost. For this reason new patterns of travel will have to be devised.

Unlike conventional ships which must limit their speed to conserve fuel, nuclear-powered ships can maintain high speed because they have no need to refuel. Another characteristic of the nuclear-powered surface ships is their reliability over long periods of time and great distances with a minimum of maintenance.

The USS BAINBRIDGE, which cost \$150 million to build, opens a vast new field in naval military operations. With its ability to travel great distances at high speeds, fewer ships would be needed to patrol an area, and crews could be rotated without extending their tour of duty. And, in case of enemy attack, the nuclear-powered ships would be more effective in the defense of the country.

MADE IN U. S. A.

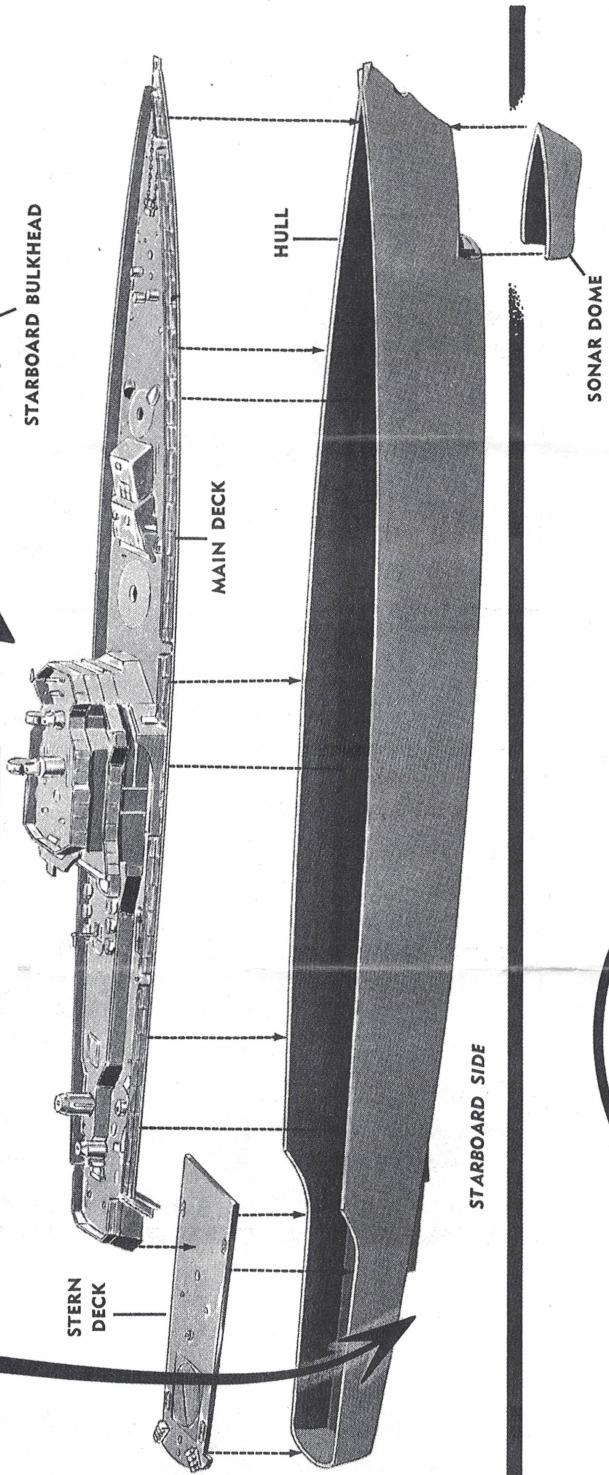

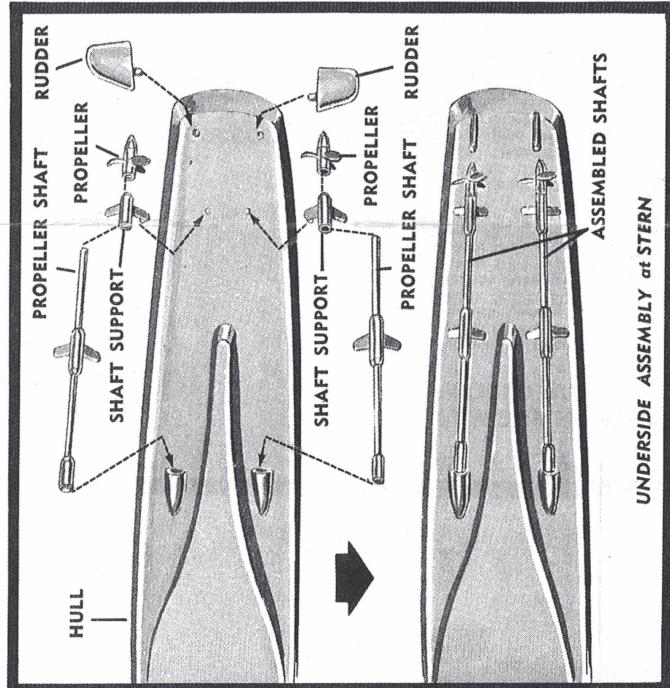

GUIDED MISSILE FRIGATE

USS BAINBRIDGE

FOR SUGGESTED DETAIL PAINTING SCHEME - SEE ILLUSTRATIONS. Paint parts as indicated and allow to dry before assembling.

1

1. Place HULL in UPSIDE DOWN POSITION, then cement PROPELLER SHAFTS and SHAFT SUPPORTS in position on HULL.
2. Cement PROPELLERS to SUPPORTS and RUDDERS to HULL at STERN.
3. Carefully cement edges of STERN DECK to HULL STERN.
4. Cement edges of MAIN DECK to HULL and cement SONAR DOME to HULL.
5. Cement PORT and STARBOARD BULKHEADS to MAIN DECK on each side of MAIN STRUCTURE.
6. Cement STRUCTURE FRONT SECTION to FRONT of MAIN STRUCTURE.
7. Cement LOWER DECK to SIDES of MAIN STRUCTURE and UPPER DECK to Top of MAIN STRUCTURE.
8. Cement TORPEDO TUBES and LOADING MACHINE to MAIN DECK.
9. Cement (2) GUN DIRECTORS, TELEMETRIZING ANTENNA and TOWING L.T.G. to UPPER DECK.

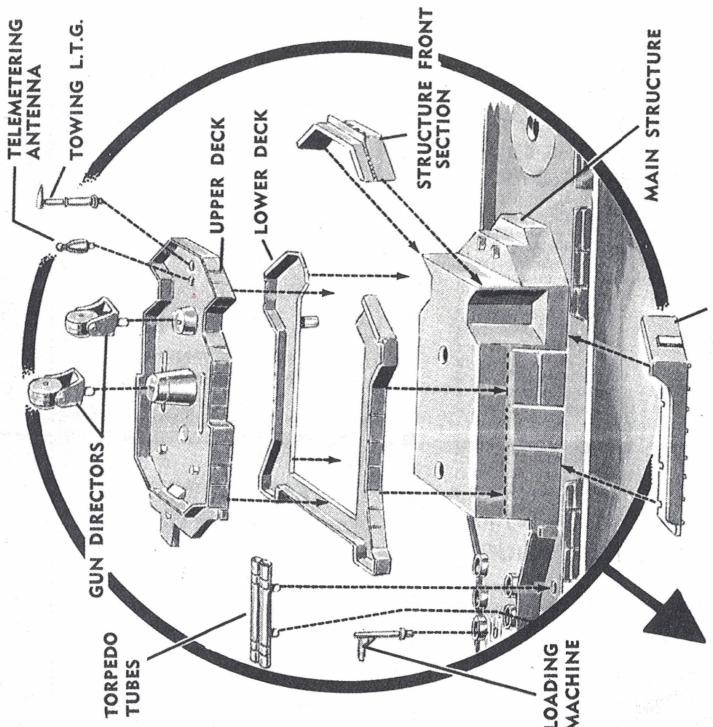

AURORA

10. Cement LEFT, RIGHT and STERN SECTIONS of SCREEN TYPE RAILING along outer edges of STERN DECK.
11. Cement AFT GANGWAY to STARBOARD SIDE.

Dip each decoupling into water for approximately 30 seconds, and then lay on flat surface.
Slide out paper back from moist fingers.

HOLD FILM WITH
MOIST FINGERS
UNDER DECAL

TERRIOR LAUNCHER

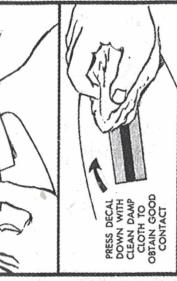

JOIN TO STERN DECK.
 13. Cement PINS on ROCKETS to underside
 of TERRIOR LAUNCHER (#2) and ce-
 ment this ASSEMBLY to LAUNCHER BASE.
 Finally cement BASE to STERN
 DECK.

14. Cement 3/50 CAL. GUN to MAIN DECK.
 15. Cement TELEMETRING ANTENNA
 and (2) GUN DIRECTORS to MAIN
 DECK.
 16. Cement (2) FAST KING POSTS to MAIN
 DECK.

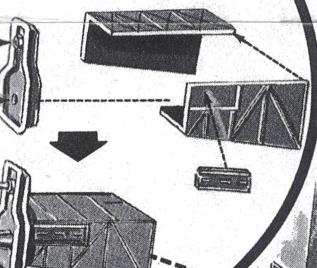

17. Cement (6) PARTS of RADAR ANTE-
 NA TOWER into position, then cement
 this ASSEMBLY to MAIN DECK.

18. Cement 26 FOOT BOAT between DAY-
 ITS and cement DAVITS to STAR-
 BOARD SIDE of MAIN DECK.
 19. Cement (8) parts of MAIN TOWER into
 position, then cement this ASSEMBLY to
 STERN END of MAIN STRUCTURE.
 20. Cement FORE GANGWAY to STAR-
 BOARD SIDE of MAIN DECK.
 21. Cement 26 FOOT and 39 FOOT BOATS
 between DAYITS, then cement DAYITS
 to PORT (LEFT) SIDE of MAIN DECK
 near ANTENNA TOWER.

22. Cement 3/50 CAL. GUN to MAIN DECK
 behind the Two BOATS and ANTENNA
 just forward of BOATS.

23. Cement LAUNCHER together, then ce-
 ment to MAIN DECK just forward of
 MAIN STRUCTURE.
 24. Cement (2) FAST KING POSTS to FOR-
 WARD MAIN DECK.

25. Cement (2) WHIP ANTENNA BORE
 SIGHT TOWER and MISSILE SAFETY
 OBSERVER STATION to FORWARD
 MAIN DECK.

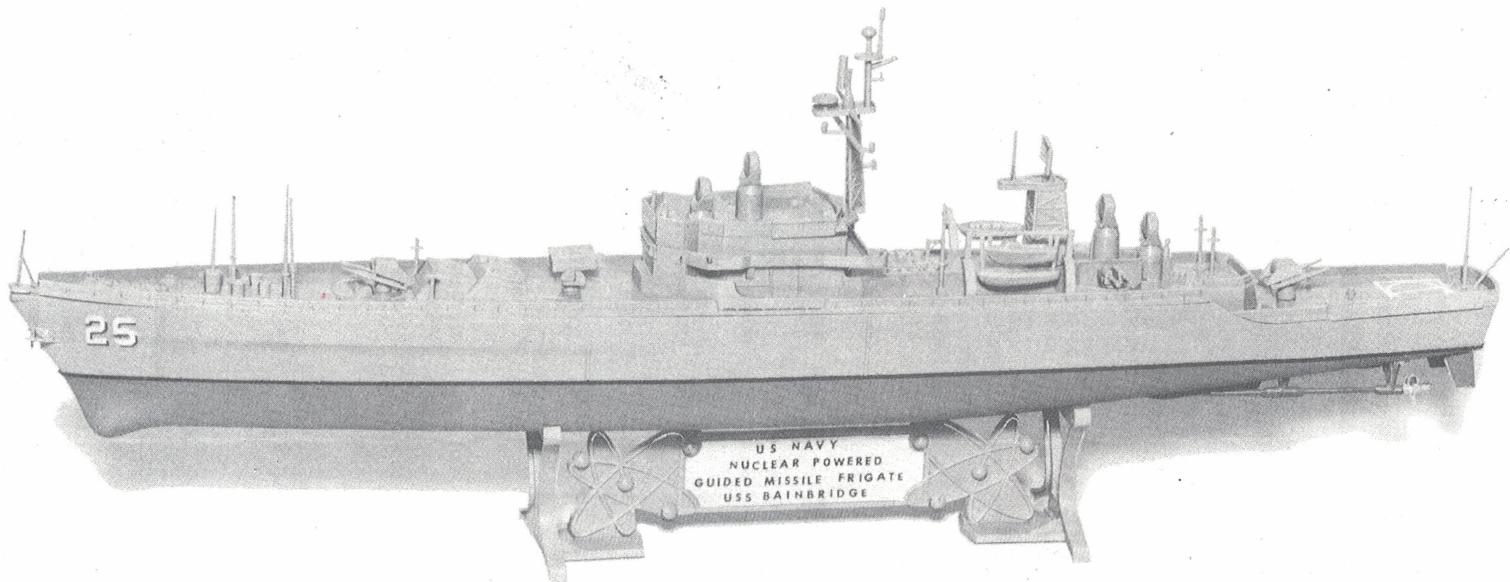

26. Cement STARBOARD ANCHOR to
 MAIN DECK and FORE ANCHOR to
 BOW.

27. Cement FORE ANCHOR LIGHT to FOR-
 WARD Tip of MAIN DECK.

28. Cement TERRIOR LAUNCHER (#1)
 parts together and cement to FORWARD
 MAIN DECK.

29. Cement NAME PLATE PANEL to STAND
 LEGS.

30. Cut out SECTIONS of DECALS and ap-
 ply to HULL. Read directions on back of
 DECALS before applying.
