Step 1

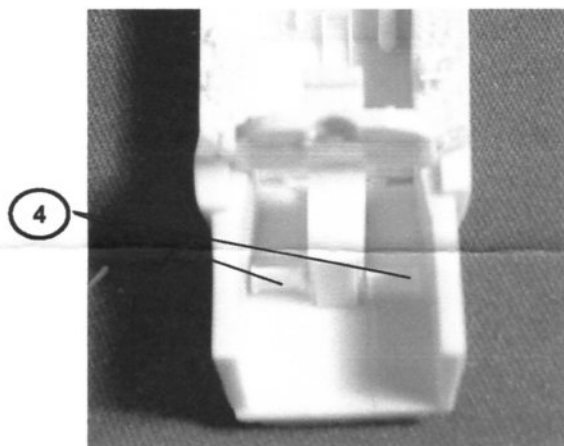

Remove all inner detail from plastic fuselage halves. Glue # 10 - 11 - 12 and 13 in place.

Step 2

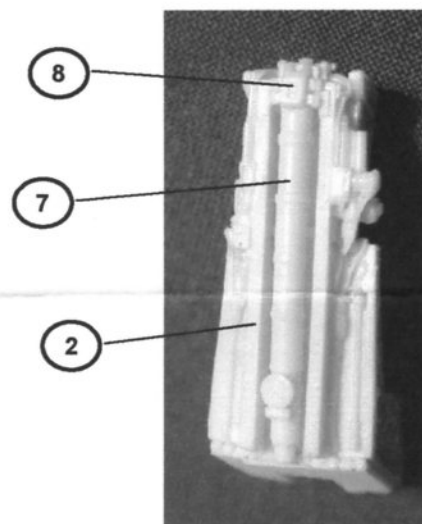

Remove carrier from tub. Testfit onto Academy's front wheel bay housing before gluing.

Step 3

When resin parts are glued onto tub, glue Academy's plastic parts S11 - S4 - S3 in place according to their instructions.

Step 4

Thanks to the **Machmaster** and **Lonnie Berry** for their relentless support.

Master pattern and instruction made by Jef Verswyvel
