PBY-5A CATALINA

In World War II, long before there were satellites or other high-tech surveillance equipment, the U.S. Navy relied on long-range flying boats and amphibians to patrol the vast expanses of ocean and search for the enemy. The most numerous of these was the Consolidated Aircraft's PBY Catalina. Perhaps best known for the search patrols that located the Japanese invasion and carrier forces heading for Midway Island in 1942, Catalinas served throughout the war as the Navy's eyes in the sky.

But the versatile use of the Catalina went far beyond that of a patrol craft. Most important to downed airmen was the search and rescue role. Crews of aircraft that had been shot down, as well as sailors from ships that had been sunk, scanned the skies for the approach of a Catalina that would return them to safety. Affectionately called "dumbos" the Catalinas could land in water, pick up the survivors, and take off again in a matter of minutes. Scores of airmen and sailors were rescued from death or capture by Catalinas and returned to duty or taken to medical treatment. Other Catalinas served as VIP transports for high-ranking officers.

This kit includes accurate silk screen decals for two different Catalinas. One from the squadron known as the "SNAFU SNATCHERS" circa 1944 Pacific Theatre. The other based from Hamilton AFB, California circa 1950.

* REPEAT SEVERAL TIMES
* A REPETER PLUSIEURS FOIS

* OPTIONAL PARTS
* PIECES EN OPTION

* DECAL
* DECAL COMANIE

* ALTERNATIVE ASSEMBLY
* ENSEMBLAGE ALTERNATIVE

* CEMENT TOGETHER
* A COLLER

* REMOVE AND THROW AWAY
* A RETIRER ET JETER

* DO NOT CEMENT
* NE PAS COLLER

READ THIS BEFORE YOU BEGIN

- * Study the assembly drawings.
- * Each plastic part is identified by a number.
- * In the assembly drawings, some parts will be marked by a star (★) to indicate chrome plated plastic.
- * For better paint and decal adhesion, wash the plastic parts in a mild detergent solution. Rinse and let air dry.
- * Check the fit of each piece before cementing in place.
- * Use only cement for polystyrene plastic.
- * Scrape plating and paint from areas to be cemented.
- * Allow paint to dry thoroughly before handling parts.
- * Any unused parts may be discarded.

DECAL APPLICATION INSTRUCTIONS

1. Cut desired decal from sheet.
2. Dip decal in water for a few seconds.
3. Place wet decal on paper towel.
4. Wait until decal is movable on paper backing.
5. Place decal in position on model, face up and slide backing away.
6. Press out air bubbles with a soft damp cloth.
7. Milkiness that may appear is for better decal adhesion and will dry clear. Wipe away any excess adhesive.
8. Do not touch decal until fully dry.
9. Allow the decals 48 hours to dry before applying clear coat.

NOTE: Decals are compatible with setting solutions or solvents.

LIRE CE QUI SUIT AVANT DE COMMENCER

- * Etudier les schémas de montage.
- * Chaque pièce en plastique est identifiée par un numéro.
- * Sur les schémas de montage, certaines pièces sont marquées d'une étoile (★) pour indiquer qu'elles sont en plastique chromé.
- * Pour une meilleure prise de la peinture et des autocollants, laver les pièces en plastique avec une solution détergente peu concentrée. Les rincer et les laisser sécher à l'air.
- * Vérifier que chaque pièce s'ajuste bien avant de la coller en place.
- * N'utiliser que de la colle pour polystyrène.
- * Gratter les parties à coller pour enlever le chrome et la peinture.
- * Laisser la peinture bien sécher avant de manipuler les pièces.
- * Toute pièce inutilisée peut être jetée.

DIRECTIVES D'APPLICATION DES AUTOCOLLANTS

1. Découper l'autocollant désiré de la feuille.
2. Tremper l'autocollant dans de l'eau pendant quelques secondes.
3. Placer l'autocollant mouillé sur une serviette en papier.
4. Attendez que l'autocollant puisse être déplacé sur son support en papier.
5. Mettre l'autocollant en position sur le modèle face sur le dessus et faire glisser le support pour l'enlever.
6. Appuyer avec un chiffon doux humide pour éliminer les bulles d'air.
7. La substance laiteuse qui peut apparaître est destinée à améliorer l'adhésion de l'autocollant et devient incolore au séchage. Essuyer pour enlever tout excédent d'adhésif.
8. Ne pas toucher l'autocollant tant qu'il n'est pas bien sec.
9. Laisser l'autocollant sécher pendant 48 heures avant d'appliquer une couche transparente.

REMARQUE: Les autocollants sont compatibles avec les solutions de fixation ou les solvants.

This paint guide is provided to complete this kit as shown on the box.

Ce guide de peinture est fourni pour reproduire le modèle réduit qui apparaît sur la boîte.
