Titanic Searcher „Le Suroît“

Die Le Suroît ist ein Forschungsschiff des französischen Meeresforschungsinstituts Ifremer. Bekanntheit erlangte das Schiff, als es 1985 an einer aus zwei Schiffen bestehenden Expedition zur Suche des Wracks der Titanic beteiligt war. Nicht zuletzt dank des damals neuartigen Sonars (Sonar Acoustique Remorqué, kurz: SAR) konnte das Wrack im am 1. September 1985 gefunden werden. Es befindet sich auf Position 41° 43 55 N, 49° 56 45 W in einer Tiefe von 3.803 Metern. Das schleppbare Seitensicht-Sonar konnte zu dieser Zeit Bilder des Meeresbodens von ungekannter Qualität erzeugen.

Titanic Searcher „Le Suroît“

The "Le Suroît" is a French Marine Research Vessel operated by the Ifremer Marine Research Institute. The ship rose to fame in 1985 when it was involved in a two-ship expedition to search for the wreck of the Titanic. The wreck was found on 1 September 1985 thanks in part to the then novel Sonar (Sonar Acoustique Remorque, in short: SAR). It is located at position 41° 43 ,55"N, 49° 56' 45"W at a depth of 3803 metres (12475 ft). The tow-able side-scan sonar was at this time able to produce images of the seabed in unprecedented quality.
