- ① Clean the model surface with a wet cloth.
- ② Cut out each decal design from the decal sheet, and dip it in warm water for 20 seconds.
- ③ Use a fingertip to check if the decal is loose from the backing paper. If so, place it in the proper position on the model, and slide it off the backing paper onto the model.
- ④ Move the design to the exact position with a wet fingertip, and squeeze out any excess water or air bubbles under the decal with a soft cotton cloth.
- ⑤ When the decals are dry, use a wet cloth to gently wipe away any residue left around them.
