

Mouse Armour Decals

1/35 scale Decals
MAD636
Australian Leopard AS1
ARVM 1977 - 2007

Background

These markings are for the Leopard AS1 Armoured Recovery Vehicle Medium (ARVM) based at the School of Armour and 1st Armoured Regiment both at Puckapunyal VIC and in Darwin NT.

Tools

Handy tools would include a sharp model knife and a set of fine nose tweezers and decal setting solution.

Decal Application.

These decals are printed onto a single sheet of decal paper. This means that you will need to carefully cut through the decal sheet for each decal and then soak it in cold water. The decal will separate from the decal paper fairly quickly – so be watchful. The decal can then be slid on to the model. Be aware that if the model has been painted with matt paints some decal softening solution will need to be applied to avoid the trapping of air under the decal itself and thus eliminate "silvering" of the decals.

Positioning the decals.
