The Dragonfly lives up to its namesake. Its nose-mounted minigun shoots up to 6,000 rounds per minute. Breathing fire, and taking advantage of its tremendous maneuverability, the A-37B served effectively in Southeast Asia and recently in Panama. It can carry a wide variety of weapons and deliver them with deadly accuracy.

Produced by the Cessna Corporation, the Dragonfly is powered by two General Electric J85-GE 17A turbojets. It can reach speeds of 478 miles per hour and has a service ceiling of over 30,000 feet. The wings span 35 feet 10½ inches and the fuselage is 29 feet 3 inches long.
