Researching the facts for this kit was interesting and enlightening. We found that the wealth of information available was at times, very controversial.

It seems, among many other facts, that some F-2 were retrofitted to F-4 standards.

Many authoritative books, at times caption one A/C as an F-2, and the next book calls it an F-4. Of course this could be a case of mistaken identification.

We suggest you look at pictures of the selected A/C and follow the features of that particular airplane. Happy Modelling

Warning: Thinning of the plastic parts and dry-fitting of the assembly needed!
Upozornění: Nutno zeslabit některé plastové díly stavebnice!
Před lepením zkontrolujte dopasování dílů!
