Lockheed T-33A SHOOTING STAR

1/72 SCALE

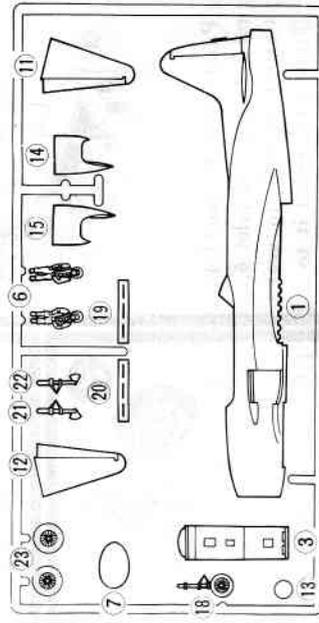

LOCKHEED T-33A SHOOTING STAR.

This is a primary twin-seated jet trainer of the American Air Force developed from the original jet fighter F-80 (P-80). Fuselage is one meter longer than F-80 in order to make it a twin-seated jet trainer; this is already considered obsolete from the present standard. Practicality and Maneuverability still makes it used as current trainer, interceptor and liaison plane. This being replaced by F-5B or T-38 in many countries. JASDF has replaced it with Fuji T-1.

PART DRAWINGS AND PART NUMBERS (Before Assembling Your Kit)

Read these instructions carefully before assembling your model and check the exact fit of the parts before cementing. Clean off excess plastic, if any, with a sharp knife or a file. Since many tiny parts are included, check them with the assembly drawing before assembling. Do not tear off parts from the stem, but cut them off carefully with nippers or tin snips. Do not cut off all of the parts at the beginning, but cut each part to be assembled one by one to assure each part being properly identified. Do not use too much adhesive because surplus adhesive will spoil the appearance.

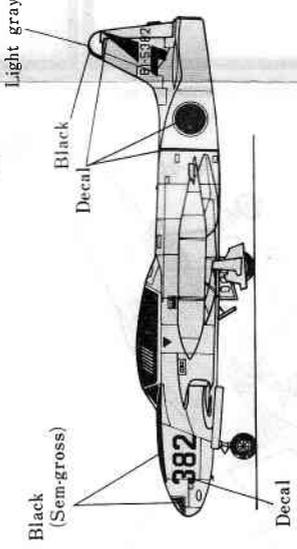

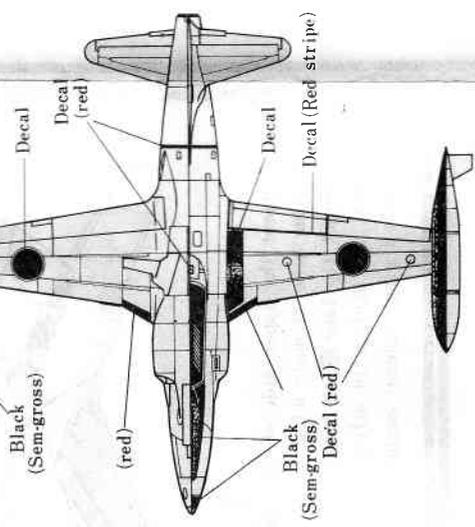

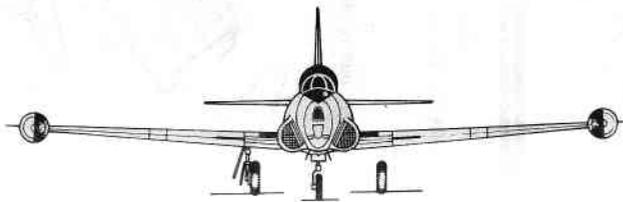

Refer three dimensional drawing for setting position and setting angle to fit the parts.

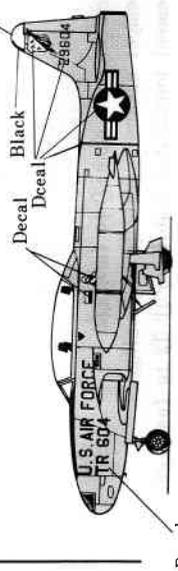

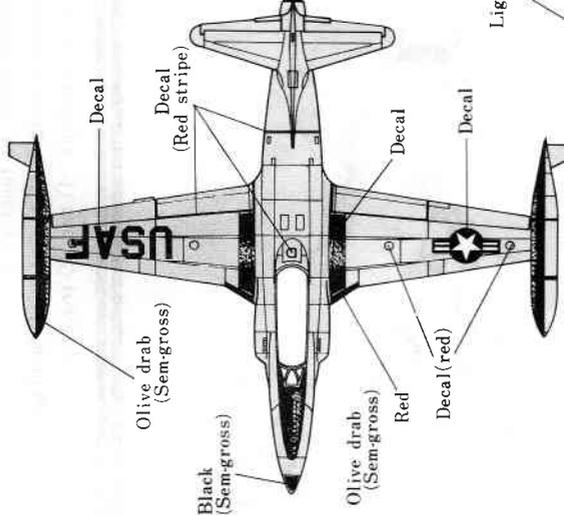

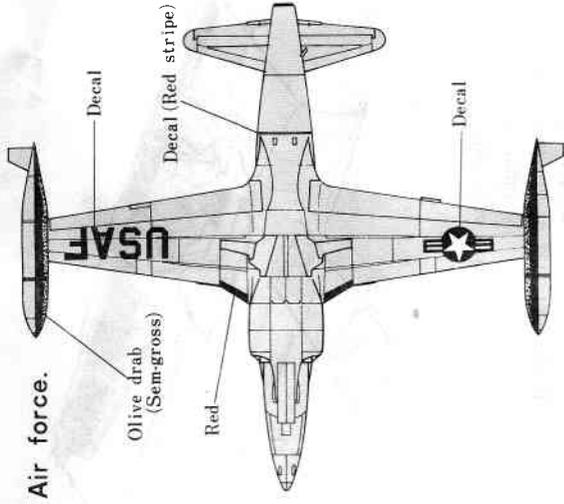

MANUFACTURED IN JAPAN
& PACKED IN ENGLAND
BY A. HALES LTD.
HINCKLEY, LEICS.

Japan air self-defence force.

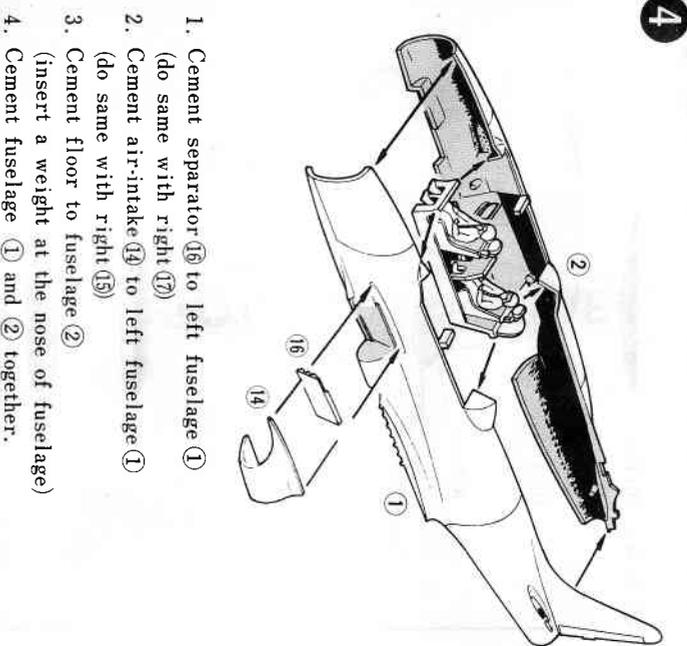

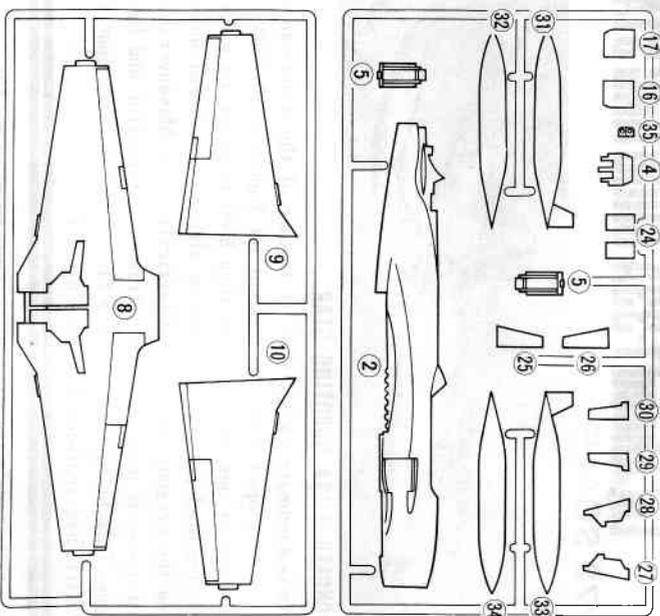

U. S. Air force.

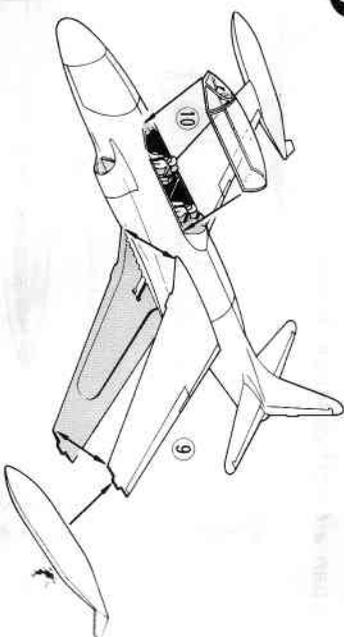

- All over the surface.....Silver.
- Interior of cockpitDark gray or Pail green.
- Pilot seat.....Dark gray.
- Pilot suit.....Orange.
- Pilot helmet.....White or Red.
- Pilot shoes.....Black.
- Interior of landing gear well } Dark gray or Pail green
- Inside of landing gear doors, air brake } Pail green
- Strut of landing gear Silver (Semi-gross)
- TireBlack (Semi-gross)
- Wheel.....Silver (Semi-gross)
- Topside of Verticil stabilizer.....Light gray.
- Landing lightSilver.

PRINTED IN ENGLAND

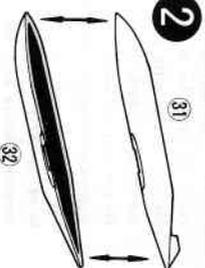

4. Cement fuselage ① and ② together.
3. Cement floor to fuselage ② (insert a weight at the nose of fuselage)
2. Cement air-intake ⑭ to left fuselage ① (do same with right ⑮)
1. Cement separator ⑰ to left fuselage ① (do same with right ⑰)

6. Cement the upper side of main wing ⑨ and ⑩ to the bottom side of main wing.
5. Cement tip tank ② to main wing.
4. After drying, cement canopy to fuselage.
3. Paint all surface in silver colour except cockpit.

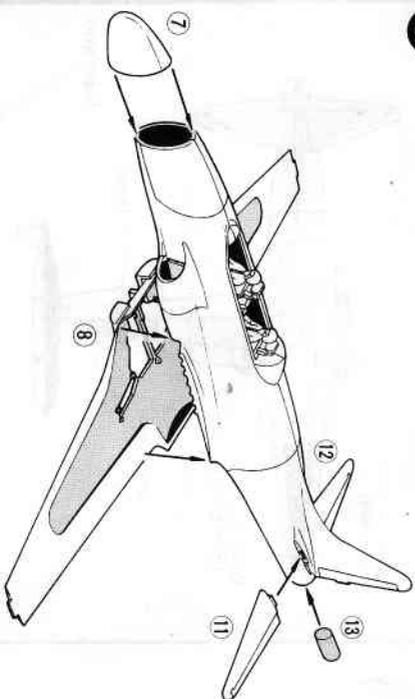

1. Paint floor ③, panel ④, pilot seat ⑤ and pilot ⑥.
2. Cement pilot ⑥ to seat ⑤ and then, cement it to floor ③.
3. Cement panel ④ to floor ③.

2. Cement fuel tanks ③① ③②, ③③ ③④ together.

3. Cement strut ⑳ to tire ㉓.
2. Cement strut ㉑ to tire ㉓.
1. Paint tire ㉓ and strut ㉑.

5. Cement the bottom side of main wing ⑧ to fuselage.
4. Cement horizontal stabilizer ⑫ to fuselage.
3. Cement exhaust nozzle ⑬ to fuselage.
2. Cement nose cone ⑦ to fuselage.

7. Cement nose wheel cover ⑰ ⑱, air brake ㉔ and other doors ㉕ to fuselage.
6. Cement landing-light ㉖ to nose gear ⑱ and then, cement it to fuselage.
5. Cement main wheel cover ㉙ to the bottom side of main wing.
4. Cement main wheel ㉚ to the bottom side of main wing.
3. Cement nose wheel cover ⑰ ⑱.
2. Cement main wheel cover ㉕ ㉖, ㉙ ㉚.
1. Paint nose whdel cover ⑰ ⑱, air brake ㉔ and other doors ㉕ to fuselage.
